## SAMARITAN COUNSELING CENTER HAWAI'I Clinical Policies

#### Welcome

Samaritan Counseling Center Hawai'i (SCCH) welcomes you as a client. It is important for you to be informed about the nature of counseling or psychotherapy, the fees charged for our services, and your rights as a client.

#### **Fees and Payment**

SCCH offers services at a rate of \$150 per 50-minute session. SCCH counselors are providers for several health insurance companies and accept the allowable fees set by these insurance companies. A sliding scale fee schedule is available based on income level and financial need. There is also a Client Assistance Fund (CAF) for those without the ability to pay for services, dependent on financial need and funds availability. \_\_\_\_\_(Int)

Full payment or co-payment should be made by cash or check at each session. Checks are payable to Samaritan Counseling Center Hawai'i. Requests for delayed payment should be discussed with your counselor. \_\_\_\_(Int)

#### Appointments

Each counselor schedules his/her own appointments. The usual length of each session is 50 minutes. When you make an appointment, your counselor agrees to make his/her services available to you during this time and you agree to keep your appointment and pay the agreed upon fee. If you are unable to keep your appointment, call your counselor at least 24 hours before your appointment. <u>I understand that I am responsible for paying for any appointments not canceled 24 hours in advance.</u> (Int)

## **Counseling and the General Course of Treatment**

SCCH counselors work within the standards and ethical guidelines of Hawaii state licensing laws, professional associations, and the Solihten Institute. SCCH counselors also respond to the spiritual and theological needs of clients who choose to incorporate their values, beliefs, and religious affiliations/spirituality into their therapy.

Counseling sessions follow a general course of treatment, which includes: intake, assessment, goal setting and treatment planning, course of treatment, and discharge.

- **Intake** covers the initial call and contact with the counselor. During this time, certain essential demographic information is collected and the first appointment is set up.
- **Assessment** may take from one to four counseling sessions. Through this period the counselor is establishing a relationship and obtaining information to develop a proper course of treatment.
- **Goal setting and treatment planning** are the outcome of the assessment process. This is a phase when you work out what goals and what amount of time is needed to accomplish the goals which are being set.
- While treatment is occurring from the initial session, the **course of treatment** is that period of time established to work in therapy on the goals and objectives, which have been established in the treatment plan.
- **Discharge** is the end phase of treatment in which the focus is ending the treatment and establishing how you may maintain the skills learned from the therapy.

#### **Mutuality and Receipt of Notice of Privacy Practices**

The best therapy occurs when there is open communication between the counselor and client. Please feel free to raise any questions or concerns you have with your counselor at any time. Your counselor will discuss these policies with you at the beginning of therapy. <u>I have received a notice of privacy practices.</u> (Int)

## **Consent for Treatment**

I am voluntarily entering counseling at Samaritan Counseling Center Hawai'i. I have read and understand this statement and agree to abide by these policies, and I have received a copy of the Notice of Privacy Practices.

## SAMARITAN COUNSELING CENTER HAWAI'I <u>Consent to VideoTherapy</u>

"VideoTherapy Services" involves the delivery of health care services using electronic communications, information technology or other means between a health care provider employed by or otherwise contracted with the Center ("Provider") and a patient who are not in the same physical location. VideoTherapy may be used for diagnosis, treatment, follow-up and/or education, and may include, but is not limited to:

- Electronic transmission of clinical records, images, personal health information or other data between a member and a Provider;
- Interactions between a patient and Provider via audio, video and/or data communications; and
- Use of output data from clinical devices, sound and video files.

# The vendor of the electronic systems used for VideoTherapy services has represented that it incorporates industry standard network and software security protocols to protect the privacy and security of health information.

#### Possible Benefits of VideoTherapy

- Can be easier and more efficient for you to access clinical care and treatment from a Provider.
- You can obtain clinical care and treatment at times that are convenient for you.
- You can interact with a Provider without the necessity of an in-office appointment.

#### Possible Risks of VideoTherapy

- Information transmitted to your Provider may not be sufficient to allow for appropriate clinical decision making by the Provider.
- The inability of your Provider to conduct certain tests or assessments in-person may in some cases prevent the Provider from providing a diagnosis or treatment or from identifying the need for emergency clinical care or treatment for you.
- Your Provider may not able to provide clinical treatment for your particular condition via VideoTherapy and you may be required to seek alternative care.
- Delays in clinical evaluation/treatment could occur due to failures of the video technology.
- Security protocols or safeguards could fail causing a breach of privacy.
- Given regulatory requirements in certain jurisdictions, your Provider's treatment options may be limited.

By accepting this Consent to VideoTherapy, you acknowledge your understanding and agreement to the following:

1. I understand that the delivery of health care services via VideoTherapy is an evolving field and that the use of VideoTherapy in my clinical care and treatment may include uses of technology not specifically described in this consent.

2. I understand that while the use of VideoTherapy may provide potential benefits to me, as with any clinical care service no such benefits or specific results can be guaranteed. My condition may not be cured or improved, and in some cases, may get worse.

3. It is my duty to inform my Provider of other in-person or electronic interactions regarding my care that I may have with other health care providers.

4. I understand that my Provider may determine in his or her sole discretion that my condition is not suitable for treatment using VideoTherapy, and that I may need to seek clinical care and treatment in-person or from an alternative source.

5. A variety of alternative methods of medical care may be available to me, and that I may choose one or more of these at any time. My Provider has explained the alternatives to my satisfaction.

6. I understand that the same confidentiality and privacy protections that apply to my other health care services also apply to these VideoTherapy services.

7. I agree and authorize my Provider and Center to share information regarding the VideoTherapy exam with other individuals for treatment, payment and health care operations purposes as allowed by law.

8. I understand that I can withhold or withdraw my consent at any time by emailing or providing other such written notification to my Provider with such instruction, without affecting my right to future care or treatment. Otherwise, this consent will be considered renewed upon each new VideoTherapy consultation with my Provider.

#### CONSENT FOR VIDEOTHERAPY

I have read this special Consent to VideoTherapy carefully, and understand the risks and benefits of the use of VideoTherapy in the course of my treatment. I have discussed it with my Provider, and all of my questions have been answered to my satisfaction. I hereby give my informed consent for the use of VideoTherapy in my medical care and authorize Provider to use VideoTherapy in the course of my diagnosis and treatment.
